## General Introduction

The most important path to success in tabroom.com is to get everything set up correctly before the tournament starts. You can correct things on the go, but better to prevent them from going awry in the first place. Since most people don't set up all that many tournaments, it's easy to go wrong. For that matter, it's easy to go wrong if you set up a tournament every week, because there's a lot of stuff here to set up.

When Chris Palmer was explaining the gestalt of tabroom, he explained it thus: Everything goes from left to right, from top to bottom. In other words, when you're setting up a tournament, start at the left hand menu and work your way down. You run the tournament from the middle menus. And you keep going until the tournament is over and you've done the last posting at the bottom of the furthest right menu.

The material that follows is not an attempt at a full manual for the program, as much of the program is explained on the relevant pages. Also, I make no attempt to explain the workings of the speech side of things, of which I have no understanding. This is all for debate. It represents the lessons I have learned running this program week after week. It seems to me like a good idea to share those lessons. I will update it as I learn no things that should be shared.

So go now, and bring up tabroom.com on your device of choice. Good luck, and may the lord have mercy on your soul.

## Settings

These are the items that need to be set up before your tournament registration opens. They can be changed later, but the closer to perfect your settings are, the better off you will be.

### Tournament

Everything here is pretty much straightforward. A couple of explanations may be necessary. **Settings/On-site registration** allows teams to register themselves when they arrive at your tournament. This is only recommended for close-knit events where no money is changing hands, and you actually trust that everyone saying they are there with all their judges are indeed there with all their judges. **Messages** allows you to show on the invoice who the check should be made out to. **Notes** is a great feature. Here you can keep tabs on everything that comes up at the tournament for the sake of institutional memory. You can consult it next year, and instead of making the same mistakes again, you can make all new mistakes.

### Rules & Results/Tiebreaker Sets

 A screenshot of a web form titled 'Create Tiebreak Set:'. It has two tabs: 'Tiebreakers' (selected) and 'Sweepstakes'. The form contains several input fields and checkboxes:
 

- 'Name:' followed by a text input field containing 'Tiebreak set name'.
- 'Advance equal numbers from each section' with an unchecked checkbox.
- 'Truncate ranks to size of smallest section' with an unchecked checkbox.
- 'Truncate ranks to' followed by a text input field.
- 'No shows/forfeits cannot break/advance' with an unchecked checkbox.
- 'MPL Time Violation penalty (+1 rank)' with an unchecked checkbox.
- A green 'Create Tiebreak Set' button at the bottom right.

Tiebreaker sets do two things. First, they determine how your brackets are structured, and second, they determine how your speakers and points are structured. If you make the right mistake in creating your tiebreaker sets, you may find yourself unable to run your rounds.

Tiebreakers are under **Settings/Rules and Results**. Let's say that your tournament has divisions in LD and Policy, and that you plan to run six rounds followed by elims. You will be giving speaker awards.

On the Tiebreakers page and in the connected help guide, there's plenty of information defining the nature of each individual tiebreaker, e.g., explaining what is a dropped high-low and what is opp-seed. Pick among these to make your sets. This one is relatively standard for LD:

**Wins**

**Points**

**Opp wins**

**Judge Variance**

**Coinflip**

**LD-PF Late Prelims Settings**

Name:  Advance equal numbers from each section ☐

Truncate ranks to size of smallest section ☐ Truncate ranks to

No shows/forfeits cannot break/advance ☐ MFL Time Violation penalty (+1 rank) ☐

**Delete Tiebreak Set** **Save Settings**

**Tiebreaks order for set LD-PF Late Prelims**

1. Winloss score from prelim rounds	<b>Delete</b>
2. Points score from prelim rounds, except the 1 best & worst	<b>Delete</b>
3. Points score from prelim rounds	<b>Delete</b>
4. Opp_wins score from prelim rounds	<b>Delete</b>
5. Judgevar score from prelim rounds	<b>Delete</b>
6. Coinflip score from prelim rounds	<b>Delete</b>

Type	Priority	Rounds Counted	Multiply By	Ignore/Drop
Add <input type="text" value="Ranks"/>	<input type="text" value="7"/>	<input type="text" value="Prelim"/>	<input type="text" value="Multiplier"/>	<input type="text" value="Drop"/> <input type="text" value="None"/> <b>Save</b>

But this set wouldn't work for Policy, because there's no ranks (assuming you're measuring ranks at the tournament). So there you might have:

**Wins**

**Points**

**Ranks**

**Opp wins**

**Judge Variance**

**Coinflip**

Save either of these sets as your all-points set, e.g., **LD Points** or **Policy Points**.

The thing about these sets is that they tally all the points a team gets. This is fine at some tournaments, and not at others. You might want to polish it thus:

**Wins**

**Hi-Lo Points**

**Total Points**

**Opp wins**

**Judge Variance**

**Coinflip**

Call this one **LD Hi-Lo**. (*This is the one set in the illustration above.*)

When you're setting up your schedule round-by-round, you might want the early rounds to go by total points, and the later rounds to go by high-low points. After all, there's no point in dropping high-lows in round two, or even in round three. It all depends on how you want to set up your brackets.

If you are doing speaker awards, presumably they will not include win-loss, or you may be running an event where ballot count comes first for bracketing, then something else. In these cases, you'll need a separate speaker set. A **Policy Speaker** set might look like this:

**Hi-Lo Points**

**Ranks**

**Total Points**

**Opp wins**

**Judge Variance**

**Coinflip**

Another simple set you'll need, if you have elimination rounds, is this one, which we'll call **Debate Elims**, and which works for all divisions. It simply grabs the winner of an elim to put into the next elim. Points are, at this stage, pointless:

**Winloss score from last elim rounds**

How you arrange these is up to you. But you do need to set them up correctly in tabroom. The two places you use them are in scheduling (**Settings/Schedule**) and in creating the tab procedures (**Events/Tabulation**).

## Judge Groups

Here's what tabroom tells you about judge groups: *Judge groups are collections of divisions & events that share judges and ratings. Every event must be in a judge group and only one judge group. Judge groups should be like "Policy" with both novice & varsity, or "IE" with all speech events. Use pools if you want to draw from a specific subset of judges for a specific round within the judge group.*

Got it?

Judge groups are tabroom's overarching organizational structure for a tournament. You're going to have certain judges doing one event, and certain judges doing another event. You start with the judges, then you build out to the events.

If you have a tournament with Novice LD, JV LD and Varsity LD, and they are all going to be judged by the same people, you will create one group of LD judges, with events for each of the divisions. If you are going to have the Varsity judged by college-aged folk and older, while the Novice and JV divisions can be judged by students, then you need to create two groups, one for the Varsity and one for the Nov-JV, with those divisions under those groups.

(And if you want the Varsity judges that are left over from Varsity to judge the Nov-JV divisions mixed in with the student judges? You're on your own for that one. In TRPC you can mark judges for different divisions and pair the Varsity first, and the judges not assigned will be there for the other divisions. Not so on tabroom. If you need to mix and match, first pair your divisions, then look at the extra Varsity judges and force them in. It's just not built to do that easily.)

Most of the data behind the tabs is clear enough, so I won't cover them all. Some key boxes in the judge group tabs do require some elucidation, though.

**Save Registration Settings**

### Register:

**Suppress judge codes (names only)** puts the judge's name on the ballot entry page, not the code assigned by tabroom.

The box about asking for phone numbers does nothing I've ever been able to detect in aid of actually getting any phone numbers.

**Forgive judge burden for drops** means that, if teams are dropped late in the game, they don't need to be covered by judges, i.e., the judge burden for non-existent teams is forgiven.

## Tabbing:

**Ballot entry method**—Entering twice is strongly recommended. Double-entry in tabroom can minimize tabbing errors dramatically, but not if you override this. That is, do set it up to enter twice, but then actually have two different people do the entry. One person entering a ballot twice will simply repeat the same mistake.

**Master Ballot Style** is where you say you want the judge's name to go on the ballot (or code, or whatever else). Other options are available, but do put in something.

## PUBLIC FORUM

Register Hires Tabbing Ratings Part timers Pools

### Part-time judging

These timeblocks allow registering coaches to mark judges as unavailable during the blocks you specify. The fees will be charged if a school is under their burden during that timeblock; so if a school owes 2 judges and only 1 judge is free on Friday night, the Friday night fine will be charged. However, if the school brings 3 judges, of which 2 are always available, the fine will not be charged.

Name	Fee	Day	Start Time	End Time	
Friday Night	50	<input checked="" type="radio"/> Fri <input type="radio"/> Sat <input type="radio"/> Sun	4:00 PM	11:00 PM	Delete
Saturday	75	<input type="radio"/> Fri <input checked="" type="radio"/> Sat <input type="radio"/> Sun	8:00 AM	10:00 PM	Delete
Sunday	50	<input type="radio"/> Fri <input type="radio"/> Sat <input checked="" type="radio"/> Sun	8:00 AM	5:00 PM	Delete
Add new...		<input type="radio"/> Fri <input type="radio"/> Sat <input type="radio"/> Sun			

Save Timeblocks

### Part timers

You can allow people to register their judges as part-timers, and charge them for missed rounds. To tell you the truth, this feature doesn't seem to work as advertised. It will charge the schools correctly, as it says, if one person does Friday and another covers Saturday, but it may not block those judges that look as if they're time-blocked, and it won't show you on your judge charts that you have someone who's only half there. Until these issues are resolved (including the fact that there's no way to print a list of time-blocked judges), I wouldn't necessarily suggest *not* using this, but keep a steady eye on it, knowing its lacks. We've been known to enter time-struck judges separately, repeating the information here. This is best used to tracking money owed.

## PUBLIC FORUM

Register Hires Tabbing Ratings Part timers Pools

### Judge pools

Use pools to only pull judges in that pool for a certain round, as in an elim. You can add judges to a pool under Paneling -> Judge Pools. Assign pools to a round under Settings -> Schedule, or under Paneling -> Assign Judges -> Settings.

Pool Name	Standby	Publish	Register	Site	
Breakers	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	PF Sun	X

### Pools

The most obvious use of pools is to create a subgroup of your judges for break rounds, but there are certainly other possibilities. However you're using them, they're created here but populated elsewhere.

## Events

Events are exactly that, the events offered at the tournament. Create these after you've created the Judge Groups to which they'll be assigned.

Some key boxes in the Events tabs:

### VARSITY LD

---

#### Main Settings

Event/Division Full Name	Varsity LD
Short Abbreviation (limit 5 characters)	VLD
Per-Entry Fee	60
Minimum competitors per entry	1
Maximum competitors per entry	1
Judge Group	Varsity LD
Designate entries on schems/ballots with	School name & entry initi
Start entry codes with:	
Event Type	LD
Event Level	Open/Varsity
Clone settings from another event	

### Main:

**Designate entries on schems/ballots** This is how you put in, presumably, the School Name and Initials, the usual style for debaters. An oft-made mistake is to put in School Code and entry initials rather than school name. If you do make this mistake, or any other team name code snafu, you can fix it by, first, getting it right here, and then going over to **Entries/Data Manipulation/Entry codes** and doing a “Go” through the miscreant divisions. (It's not a bad idea to go through this particular data manipulation even if you've set things up correctly. When names are changed after original entry, often the code doesn't change with them. This will fix that.)

**Event type:** Be specific. It's LD or PF or Policy, not Debate.

**Clone entries:** Use this if you have various iterations of, say, LD. It's especially useful in copying your message pages (see below).

## Tabulation:

Allow repeats on different sides <input type="checkbox"/>	
Ignore prefs once an entry loses: <input type="text" value="3"/>	

**Save Tabbing Settings**

There's a lot here. And here's an important point: You can change these in the middle of a tournament. For instance, you probably don't want **teams from the same school** to debate, but maybe you're running a small league and in a late round there's just one same-school pairing you want to run: go in here, change the setting, pair the two teams, then come back and change the setting back. The pairing will stand. You might also leave **repeats on different sides** blank starting out, but when the judges stop fitting in later rounds, you can switch it then.

**Tiebreak set for speaker awards:** This is where, if you don't select a set with the right info on speakers and ranks, you will get into trouble. Make sure you have ranks if your event needs ranks, and that it doesn't have ranks if it doesn't need them.

**Use live updates** will tell judges and students where to go if they are linked to tabroom.

If **Online Ballot Entry** is also checked, linked judges will be able to do e-balloting.

**Ignore prefs once an entry loses 3** means that your MJP doesn't matter much after you're eliminated from getting into elims, in this case when you're down 3. MJP best practices will be handled separately in this document.

**Minimum points** will be zero if this is left blank.

**Round Robin format** takes over everything and provides you with presets for as many people in your pods as makes sense.

HFILL LPWs okay

PF, for each of the three top boxes. Keep in mind that your PF judges are often newcomers, and may need help.

**TOPIC:** Resolved: Development assistance should be prioritized over military aid in the Sahel region of Africa.

Judges should decide the round as it is debated, not based on their personal beliefs.  
 Debaters should advocate or reject the resolution in manner clear to a non-specialist citizen judge. Clash of ideas is essential to debate.  
 Debaters should display logic and reasoning, advocate a position, use evidence, and

communicate clear ideas using professional decorum.

Neither the pro nor con should offer a plan or counterplan, defined as a formalized, comprehensive proposal for implementation. Rather, they should offer reasoning to support a position of advocacy. Debaters may offer generalized, practical solutions.

Crossfire should be dedicated to questions and answers rather than reading evidence. Evidence may be referenced.

No new arguments may be introduced in the Final Focus; however, debaters may include new evidence to support prior arguments.

Debaters must supply evidence on request to the judge or their opponents.

## Schedule

The scheduling process in tabroom isn't terribly complicated for a simple tournament. But if you're running a lot of divisions in a lot of buildings at a lot of different times, it's your tool for keeping everything straight and everyone in the right places at the right times. Once you get the hang of it, it's your best friend.

At its simplest level, when you're running, say, four rounds of debate in a given day, all at the same starting time, all you need to do is, first, create time slots and second, apply them to the divisions. When you're running a lot of different things, you still create slots, only more of them.

When you first come to the Schedule page, you'll already see the days of your tournament on the right, because you've already set them up, and you'll see all your events below under the heading Schedule Rounds.

### TIMESLOTS: FRIDAY

Label	Day	Start Time	End Time

Varsity PF

Varsity Policy

Events in red have no rounds scheduled. You MUST schedule rounds for events before pairing or exporting to the CAT.

It is a good idea to name your timeslots as what they are. When you start adding new timeslots, call them LD 1 or PF 2 or Policy Semis or whatever. The more things you're running, the happier you'll be if you've named them clearly. In the example below, there are two "patterns" of IEs, as compared to a single slot for each IE. Which event was in which pattern changed during the day.

## TIMESLOTS: SATURDAY

WARNING: One or more rounds (in blue) ends before it is scheduled to begin. Time and space laugh at your disobedience. Chances are there's an am/pm problem here.

Print Master Schedule

Rumor has it that Extempers like to double-enter in OO, if that's of any help to you.

I recommend going through one activity at a time, from start to finish. Be realistic; you can adjust things later, but your sanity will be safer if you don't have to readjust. Note that you work by days, not by events, so first you have to do the Friday slots, and then the Saturday slots, or whatever. Still, do one event at a time, start to finish.

Do not overlap the times. That is, don't start a round at 9:00, end it at 11:00, then start the next one at 11:00. End the earlier round at 10:55. In the allotments of judges and rooms, tabroom will assume that, if you've put something into a timeslot, whatever you put in is no longer available. So if you're doing presets for your first two rounds back-to-back, and don't allow a tiny interval between them, tabroom will think that all your judges in the first round are unavailable for the second round.

After you've created the slots for an event for all the days of the tournament, click on the event under **Schedule Rounds** and assign those slots. If you've named the slot exactly what you want it to be called on the ballots, you don't need to add a round label. The type of each round must be selected from the five choices, since presets are calculated differently from hi-lo/hi-hi, which are different from elims, which are different from the final. Next to that it's your tiebreak set. If you have a bum set in here, you may not be able to get the round to pair, so make sure you've set up good tiebreakers, and that you're adding the correct one to each round. Finally, if you've got judge pools (e.g., a "LD Breaks" pool), make sure to assign it correctly.

### ROUND SCHEDULE FOR VARSITY LD

Friday 1/24	Y/N	Round Label	Type	Tiebreaks	Site	Pool
PF 1	5:00 P	<input type="checkbox"/>				
LD 1	6:00 P	<input checked="" type="checkbox"/> 1	Label	Prelim/Preset	Debate prel	LD Friday

[Print Master Schedule](#)

You repeat this process for each event. Again, and this can't be emphasized enough, if you have a problem, it probably stems from something awry here, so take great care, and look here first when you're troubleshooting. After you've assigned all the timeslots to all the events, you can print a Master Schedule. Do not skip this step, as going over this carefully will show you that either everything is where it should be, or that one of your rounds is set to start at 10 in the morning and end at 2 the previous morning or somesuch, and all hell will break out as a result.

## Rooms

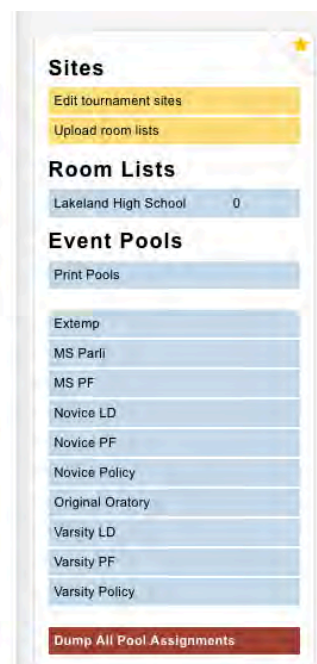

Before doing your rooms, schedule all the rounds of the tournament. You can adjust the schedule later, but you need to have rounds scheduled before you create room pools.

Working from a spreadsheet for your planning of the rooms prior to entering them in tabroom is a very good idea. You can move rooms around easily in Excel to see what you're using and when you're using it; tabroom is for after you've made your decisions.

The best way to handle rooms in tabroom for the average tournament is to, first, create a single site, and second, to divide that site into room pools. This is a fairly simple process at a tournament in one building with a handful of divisions, but it can get complicated as a tournament spreads out and different rooms are available on different days. It is advisable that one person oversee the room assignments at huge tournaments with multiple events in multiple buildings. Use Google drive to share the file with all your tab staff.

The first step in tabroom is to create the site. Under **Settings/Sites & Rooms**, go to **Edit Tournament Site** and create your site, e.g. Bump or Ridge or NYU. Remove any other sites from the tournament.

## ROOMS FOR WESTCHESTER CLASSIC LAKELAND

Populate the site: You will see the site you've created under **Room Lists**. Click on your site, and you can simply type in the rooms. (Alternately, you can upload a pre-existing list using the **Upload room lists** feature, but this can be frustrating if your file isn't formatted perfectly. Correct formatting is roomname,###,###,¶. Save the file as text, ASCII Western or US, and then upload. If it doesn't work, it's probably because you're saving as regular text, and not the weird ASCII version.)

You now have a full list of all your rooms. **Forget everything else you see on this page;** it is the road to perdition, because although it looks as if rooms can be assigned here, as far as tabroom is concerned, they're really only being suggested. Go away. There's nothing to see here.

PANELING
Reports
Pair Rounds
Assign Judges
Assign Rooms
Judge Chart
Judge Pools
Room Pools
Publish

Go instead to **Paneling/Room Pools**. At most tournaments, you probably want a pool for each division, let's say one each for VLD, NLD, PF, etc. So **Create New Room Pool** for VLD and you'll see a list of all the rooms at the site that you've already entered. Click on the rooms you want in this pool, and they will be the ones in your VLD pool. Assign which rounds will use this pool with the **Use for Round** drop-down. Refresh the screen, and you'll see the list of the rooms in the pool. Repeat the process for each event.

## ROOMS FOR NLD PRELIMS

Note: this will override any event specific pools you have created under Settings -> Sites

### 11 in pool:

NLD Rd 2

NLD Rd 3

NLD Rd 4

NLD Rd 5

### Use for round

Select an Option

Pools are not exclusive; that is, you can have the same room in different pools (which may seem counterintuitive but which makes sense when you're moving elims or sharing in different time slots). So you need to be careful that, as you create each pool, you are not using the same rooms at the same time. This is where your planning spreadsheet will come in handy, and another reason why it's so important to set up your schedule correctly in the first place.

Once pools are set and assigned to rounds, the tabulation will automatically draw from those pools. As a tournament progresses, you can adjust the pool if you want. For instance, as you enter elims, you may want all your VLD rooms available from the prelims for the first break, but as the number of needed rooms lessens, you may want to close off a floor or centralize things or only use bigger rooms or whatever. Do this before pairing each elim. Alternately, of course, you could just have a pool for each elim, if you prefer to plan that way.

## Website

Once upon a time people wrote invitations and mailed them in an envelope to a generic “Debate Coach” at every school they could think of. How quaint. Nowadays people still write invitations and they post them on tabroom. How quaint.

### YOUR TOURNAMENT WEBSITE

You can post materials publicly here for inclusion on the website that appears when people click on your tournament off the tabroom.com main website.

Your tournament website will always include a listing of the events you offer, a listing of the registration deadlines and tournament dates, and a link on registering for your tournament. Tabroom.com also includes automatic posting of field reports, schematics, and results.

The link for your public tournament website is:

<http://lakeland.tabroom.com>

#### Standard Pages

- Main Page
- Events
- Field Reports
- Postings

#### Custom Pages

Add Custom Page

#### Postings

- Field Reports
- Publish Schematics
- Lists of Clearing Students
- Upload Files/Postings
- Live Updates

Use the website, my friend. It’s simple enough and doesn’t require any particular instruction; just go to the website page on tabroom and add your various pages.

The **Main Page** is the first one people will see. You can explain however much you want to your heart’s content, but here’s the most important thing: **Put up a separate custom page for your schedule, and don’t post the schedule anywhere else.** That way, when you update the schedule, you’ll do it here, and the only place people can go to see a schedule is this one place, which is always accurate.

## Entries

The **Entries** menu is the door to where all your data resides. This is where the entries and judges appear as the schools register, and where you can adjust who is doing what, when, such as dropping students, limiting a judge's availability, etc.

ENTRIES 
Schools
Housing
Events
Judges
Reports
Change Log
Data Manipulation
Emails

## Schools

The schools page is relatively self-explanatory. On the left are the schools registered but not yet at the tournament. On the right are the schools that you've marked as In, assuming you're using tabroom to track actual registration at the tournament.

Here's some things you should think about.

## Empty Schools

A lot of schools will look at your tournament on tabroom, and by so doing generate a registration for the tournament. There are no actual entries in this registration, unless they take the next step and put in some names. So when your online registration deadline is reached, there will be a bunch of empty schools that never intended to come, but were just curious. Also, there might be some schools that dropped their entry, but the school is still there. You can delete them thus:

### Entries/Data Manipulation

On the right, **Entry Manipulation/Empty Schools**

*Voila!* Note that some schools might not be deleted even though they appear empty. Those you'll have to go into and delete at the school page level. Still, it's better to make these go away than to have them taking up mental space.

## Registration at the tournament

**Onsite Registration** ★

Onsite Status by Event

Entry Regist'ns	Entry Assig'ts.
Judge Regist'ns	Judge Assig'ts.
Invoices	Housing
CSV: All Entries	CSV: All Judges

One of the things tabroom was originally built for was tracking registrations, and it makes sense to take advantage of this functionality at your registration table.

First, print up all the registrations and invoices the morning of the tournament: **Entries/Reports/Complete Packets (on the right)/Reg & Invoice**

When people arrive at the desk, hand them their packets and bring up their school on the computer. If they have changes, enter them into tabroom. If the money changes and they need a new invoice, you can print it up for them on the spot (the function is on the right of the school page; see below). Finally, you can mark them in as Registered (either paid or not paid).

That will move the school over to the “in” side and get rid of that big red NOT REGISTERED banner. You now know that they’re here, whether or not they’ve paid, and that their registration is accurate.

Print Student Sheets

**NOTE:** This is NOT the same as **Settings/Tournament/Settings/Enable Onsite Registration System**. That setting allows schools to mark themselves as in, and is only recommended for events such as where small local leagues simply show up with some kids and don’t have to pay and the kids and judges are only pinned down at the last minute. You do not have to enable a normal invitational registration. It is there if you want it; if you don’t want it, it’s still there, you just aren’t using it.

**NOTE TWO:** Marking a school as “in” versus “not in” has no effect on that actual entries. That is, if a school isn’t marked as in, its teams and judges are still in the system and presumed active and will be paired. Onsite registration—moving entries from not in to in—is organizational, not functional.

## Events

There's nothing confusing about **Entries/Events**. Here's all the teams registered, by division.

## DIVISIONS AT NYCFL GRAND TOURNAMENT AT STUYVESANT

Event	Active	Drops	Waitlist	Total
DEC	12	0		12
DP	6	0		6
DUO	5	0		5
Lincoln-Douglas	7	0	0	7

You can go into any entry and drop it, put it on or take it off a waitlist, change a name, etc. You can print data sheets on individual entries and all sorts of overall CSV sheets for the division as a whole. It's all here.

If anything goes wrong with an entry during a tournament, such as an entry not appearing on the schematic (it happens), you can go here and you'll see a button [**Add Manually**] to force the entry in.

If there's errors in tabbing, you can click on **Wreak Havoc/View-Change Results** and make corrections. (View-Change Results links show up in a number of places. The thing about them is that they are definitive: make a change here, and it's in. If you're entering ballots with a double-check, this is a potentially dangerous way around double-checking. Use this function judiciously.)

Harris AE	NLD	Amr El-Azizi	Harrison

**IMPORTANT:** It is probably better, after a tournament starts, to mark a judge as not **active** rather than to drop the judge, if the judge goes out for any reason. You can always reactivate.

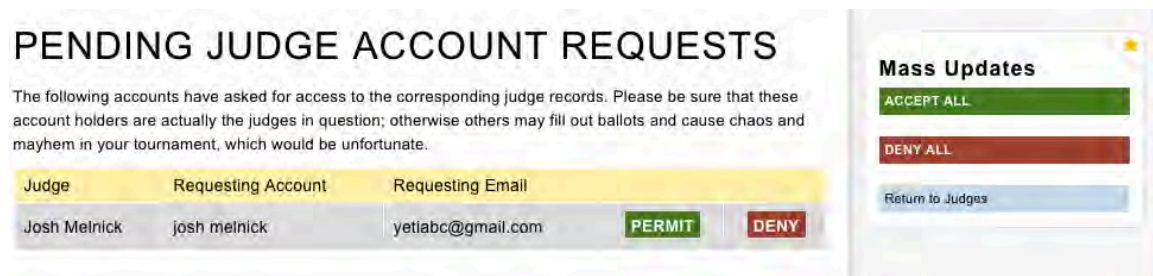

If you want to know if you have a judge's email or phone number, bring up the **All Judges CSV** file in Excel, accessible from the main page of judges for each division.

### Enabling e-ballots

This is where, when judges connect their tabroom.com accounts to a judge, you make the link. It's that little green or red Judge Account Requests, which only show up if you have e-balloting and judges need to get linked. Judges who are already linked will automatically get e-ballots.

Click the button, and you can handle the requests.

One important process handled here is the hiring of judges. Some thoughts on hires:

- Tournaments need more judges than the pure mathematical number apparently required. Double-flighted PF with 80 entrants looks like it needs 20 judges, but with judges who disappear, sickness, conflicts, strikes, etc., a minimum of 25 is what's really required. These are not hired/sold, just extra. **As a rule of thumb, you should always have at least 5 extra judges for each division beyond the mathematical necessity.**
- Unless you have more judges than there are stars in the heavens, handle your hired requests manually (**Settings/Judges/Hired Judging**). Sell your hires as you acquire them, after you've got your first 5 extra.

- Give your hires to the people who need them. Presumably people will request more hires than you can supply. If you don't handle your hires manually, they will go first come, first served. But local schools and big programs can almost always supply their own judges, and no tournament is obligated to do their job for them. **The hired requests you want to fulfill first are for the people who travel furthest to your tournament.** If someone is flying in, their flying in of judges as well is a big, expensive deal. After satisfying as many long-distance requests as you can, if there are any hires left over, then you can dole them out to the locals.
- If you click on a judge group under **Entries**, you can then go to the right and handle hire requests. You'll get a screen like this, provided you're offering hired judging:

VPF JUDGING REQUESTS

School	Request Made	# Judges Requested	# Accepted
Manchester Essex	10/1 1:07P	<input type="text" value="1"/>	<input type="text" value="1"/>
Delbarton School	10/1 1:20P	<input type="text" value="1"/>	<input type="text" value="0"/>
Needham	10/21 5:07P	<input type="text" value="1"/>	<input type="text" value="1"/>

[Save Changes and Notify Coaches](#)

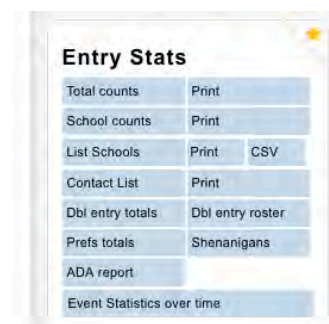

- AN IMPORTANT NOTE ON THIS FUNCTION: **Hired requests may not be accurate.** Before granting any requests, make sure that the requesters got the number right. Maybe they've dropped or added teams, or maybe you're selling by the entry but they're assuming that they're buying to cover more than one entry. Check first! This will save a lot of heartaches later.
- The judge groups under **Entries** are how you add your hires. Click on **Add Judges** on the first screen. Do not make them part of the host school, unless the host school has entries. Hireds are hires, and putting them into the hired area of tabroom makes it easiest for you to keep track of them.

## Monitoring the Data

The bottom 4 entries on the **Entries** menu allow you to take care of business as the tournament gets closer. Most of it is self-explanatory, but there's some features you should specifically think about.

## Entries/Reports/Shenanigans

### REPORTS

Entry Stats	
Total counts	Print
School counts	Print
List Schools	Print CSV
Contact List	Print
Dbl entry totals	Dbl entry roster
Prefs totals	Shenanigans
ADA report	
Event Statistics over time	

Shenanigans are when people enter the same judge to cover different divisions. In other words, Joe Blow will be listed as a judge in both PF, say, and Policy. We will be generous and assume that the registering school has made an honest mistake, but what it means is that they're short a judge. Always check for shenanigans right before and after judge registration closes.

## Entries/Reports/Money

Money/Concessions	
Money Totals	Print
All Fines	Print
Concessions	Print
Diet Restrict'ns	Print CSV
Schools Owing Money	

If you assess fines during your tournament, they will show up clearly on the **All Fines** printout. Any fine assessed at any time will appear immediately, so when you're pushing ballots and hit **Remove and Fine** for a judge replacement while all hell is breaking loose, a nice record is being kept of it so that you don't have to. The example below has had the school name and judge name redacted, but it does show what they missed and the amount owed.

	Judge J W	Dubs of VLD \$50
--	-----------	------------------

## Entries/Change Log

It is a good idea to set up your tournament to log changes (**Settings/Tournament/Settings**). People will tell you they signed up months ago, when in fact they signed up yesterday. On this Entries page you can see as much or as little as you want of the entries and changes. This used to be a way more important page when we were porting the data over to TRPC, and wanted to check if there were any last minute changes at the registration table, but it is still useful occasionally during the run-up to the tournament.

**REGISTRATION LOG** Between Wed 12:00 AM and Mon 1:54 PM

Day	Time	School	Change	
1/26/2014	8:40 PM		Jim Menick dropped judge Semoncha in VLD	Del

## Entries/Data Manipulation

**Entry Manipulation**

- Add new school
- Empty schools
- Drop TBAs
- Delete TBAs

**Codes & Names**

- School codes
- School states
- Entry codes
- Entry names
- Judge codes
- Mutually conflict schools' judges

This is a very important area. Here you can:

- **Add New School**, usually when someone is registering late and can't get in themselves.
- **Empty Schools** brings up a list and allows you to eliminate them from the tournament, which is especially important if you want to track per-school fees. Note that sometimes empty registrations may stick, and you'll have to go into the actual school to get rid of them.
- **Drop (or Delete) TBAs**: If you have TBAs signed up for your tournament, at some point you will want to eliminate them. They're great for signing up early, but often people keep them hanging, and this can wreak havoc with your planning and waitlist management. You should eliminate TBAs about two weeks before a tournament begins. Make sure you let your registrants know a couple of days in advance that it's happening so that they can enter real names.

- **Entry Codes:** This one is extremely important, and I recommend you run it before every tournament the morning of the event as a matter of course. During signups, people often change entry names. Often the changes are not reflected in the entry code, and confusion ensues when the rounds are paired. Also, this is your chance to make sure that your entries are coded correctly.

## RECODE EVENTS

Event	Lowest	Highest	Start	Sort by:	
DEC B	400	487	400	By School ▾	Go
DP B	600	698	600	By School ▾	Go
DUO A	500	551	500	By School ▾	Go
EX B	100	168	100	By School ▾	Go
Oi A	800	945	800	By School ▾	Go
OO A	300	363	300	By School ▾	Go
PF	Alexandria Potomac HK	Wasatch KS		Initials	Go
CON	1000	1082	1000	By School ▾	Go
VLD	Bronx Science AF	Whippany Park SK		Initials	Go

If you look at this function and see **101 3826** and what you wanted to see was **Central High JF**, you'll need to go back to **Settings/Events/Main** to "Designate entries on schems/ballots with..." whatever you prefer from the selection. After that, run the entry code fixer, and all will be fine.

## Entries/Emails

Obviously, this is the place whence you send emails to your entrants. Note that you can slice and dice the recipients in a variety of ways. Most useful is the subsection addressed to schools short on judges, especially when the deadline is looming.

## EMAIL REGISTERED COACHES

## Pairings

### Basic prelims

If you're running a speech event, you do it under **Paneling**. If you're running a debate event, go to **Pairings**. While there is plenty of useful stuff under the Panelings menu, it is not our main operational area. We'll cover it later.

Each event you've created appears in the menu., organized by type of event. When you first click on the event you wish to pair, you'll see something like this.

Nothing has been done yet. You can see the number of rounds you've scheduled in the tabs at the top of the page, and the names you've given those rounds (if any).

The first step in pairing a round is to check the settings. Click on **Edit Round Settings** in the **Change & Destroy** area to get a screen like this one:

**NOVICE LD** **ROUND 1: 3:00 PM** 0 not in

Rd1 Rd2 Rd3 Rd4 Rd5 Rd6

### Labels and Information

Round Label. If blank, round will be shown as "Round 1"

Message on pairing/posting

Resolution/Motion

### Pairing & Times

Round Type: Prelim/Preset

Time Block: Round 1

Start Time (on pairings): 3:00 PM

Round length in minutes (Offsets Time on Flt B ballots)

Do not minimize room moves

Number of judges per panel: 1

Judge pool: Use All Judges

Number of flights: Single

Tiebreakers for seeding: LD-PF Early Prel

**Save Round Settings**

### Share & Enjoy

Start time: 3:00 PM **Set**

Blast Emails & Texts **Go**

Results: Not Public **Go**

### Display & Print

Show Pairing w/Schools

Print Pairing w/Records

Ballots by Name Ballots by Room

Ballots for unlinked judges only

### Change & Destroy

**Edit Round 1 Settings**

**Auto-pair round**

**Pair round manually**

**Delete Round**

Create sections using the Create

**Labels and Information** is self-explanatory. The rest of it is your chance to double-check everything. Do so carefully.

**Round length in minutes** sets the offset time when you have flights. As a rule, put in 50. This will put in a start time of 3:50 for Flight B in the example above. If you leave this blank, you're trusting to fate that everyone will show up on time, and you'll have no way of handling forfeits.

Unless you've created a special judge pool (unlikely in the normal course of prelims), you will use all judges. Make sure you have the right number of flights and the right tiebreaker set. Then click the **Save Round Settings** button (changes don't automatically get saved here).

After your settings are saved, you'll do the pairing. Use **Auto-Pair round** to get a screen like the one below:

The screenshot displays the 'NOVICE LD' interface for 'ROUND 1: 3:00 PM'. At the top, there are tabs for rounds Rd1 through Rd6, with Rd1 selected. A status indicator shows '0 not in'. The main area is a table with columns: Room, Aff, Neg, Use, and Judge. The 'Room' column lists various schools, while 'Aff' and 'Neg' columns list their respective opponents. The 'Use' and 'Judge' columns are currently empty. To the right of the table are three panels: 'Share & Enjoy' with options for Start time (3:00 PM), Round (Not Public), and Blast Emails & Texts; 'Display & Print' with buttons for Show Pairing, Print Pairing, Ballots by Name, Ballots by Room, and Ballots for unlinked judges only; and 'Change & Destroy' with buttons for Edit Round 1 Settings, Auto-pair round, Hand pair round, Auto-pair judges, Hand-pair judges, Assign rooms, Erase entries, Erase judges, Erase rooms, Erase round, Fake Results, Whole Event, Mass Judge Push, and Edit Novice LD Schedule.

None	Scarsdale ML	Achievement Firs		

This gives you a pairing. Next up, **Auto-pair judges** and **Assign rooms**. It really is as simple as that—often.

When you're ready to release the pairing, your print functions are under **Display & Print**. If you're using only printed ballots, print **Ballots by Name**. If you have electronic balloting, just print **Ballots for unlinked judges**. If all your judges are linked, when you click this button you'll be taken to an empty page; that means that this particular division is operating in the 21<sup>st</sup> Century.

Under **Share & Enjoy**, you can do what we like to call Releasing the Kraken. You can make the round public on the web (at tabroom, of course), and blast an email to everyone who is linked to tabroom telling them, student or judge, where to go and when. After results are in later, you can also post those from here.

## Changing judges

There may be some reason you don't want a certain judge in a certain round. Click on the room or the judge's name in the pairing to get this action screen:

**Judges**

Chair	Judge	Foll	Rate	School	Remove

View/Edit Results

Add literally any judge:

An, Liping

The first place to look is under **Available judges**. This pull-down menu will show you who isn't on for this round, or this flight of this round if it's double-flighted. **Judging elsewhere** shows, obviously, judges with assignments. You might want to juggle some of this around in, say, an MJP situation (the teams' prefs show next to the name). Sometimes you'll see more judges if you toggle the **Flight**, over on the right.

When you've found a judge you want, click on the **Add** button. This will place that judge into the round, but not remove the original judge. You have two options: **Remove**, and the original judge will be tossed back into the available poll, or **Remove and Fine**, which will similarly toss the judge back, but impose a fine, presumably for not showing up. This is how you'll probably handle pushed ballots.

At the bottom of the illustration above is a button to add literally any judge in the system. Use this carefully, but it's very helpful when, for instance, you know there's a policy judge you can drag into just this one LD round.

## Changing rooms

Click on the room in the pairing. It will bring you to same screen above. You can toggle to a different room over on the right (assuming one is available).

## Changing debaters

What if you need to substitute one debater for another? In that case, click on a debater's code in the pairing to get a screen like this:

### MOVE ENTRY

Tap on an entry or blank position to swap in Charles Dickens T3. Orange entries have debated Charles Dickens T3 before. Red entries are from the same school/institution.

Room	Judges	AFF	NEG	Bracket
1	(33) 33, Test	Effervescent T1 N A	Fuggedaboutit T4 A N	0
17	(14) 17, Test	Effervescent T2 N A	<b>ME: Charles Dickens T3</b> A N	0

Name Entry 37  
School Charles Dickens

### Add More Rooms

Number

### Byes

Give Charles Dickens T3 a bye

This is the **MOVE ENTRY** screen. That's exactly what you're going to do. The team you clicked is named at the top, then shown in green along with the other debaters. What you want to do here is click on the team that you want to replace the green one with.

That is, let's say you wanted to switch the green team, Charles Dickens T3, with Demonology T1. Click on Demonology T1, and the switch will happen immediately. Fred Mertz T15 is orange because they debated Dickens in a previous round; you don't want to replace Demonology T2 with the Dickens team, needless to say. The other Dickens team is red. Note that this is an almost entirely non-intuitive process; be careful when you're doing it. Also keep in mind side restraints if it's an even-numbered round.

### Alternate ways of pairing a round

You can hand-pair the round if you wish. This option is available under **Change & Destroy**. This is usually necessary in very small divisions, where tabroom will simply refuse to make a pairing. You can also hand powermatch. A word of advice: in the situations where you need to do these things, you inevitably will have a small number of teams. The easiest thing to do is print out team cards and lay them out on the table and figure it by hand, then put the assignments into the computer. Trust me on this.

### Hand-pairing judges

Tabroom will pair better than you, as a rule, especially in MJP situations. Nevertheless, there are times when you want to do the assignments yourself. You can do this by clicking the button under C&D after a round is paired. This is the hand-pairing screen (with no judges assigned yet):

**ROUND 1 MANUAL JUDGES**

Bkt	Entries	Chair Judge	Other Judges	Prefs

**Round**

[Return to Round 1](#)

**Unused Judges**

- Belfiore, Rose Mari
- Chace, Alyaa
- Dinstein, Ofir
- Fonarev, Jamie
- Jeng, Amos
- Jobi, Demi
- McKenna, Teddy
- Menick, Jim
- Morse, David
- Nance, Kate
- Simkovits, Matt
- Sosa, Laura
- Walker, Eyana
- Wilson, Ahn
- Zinman, Lauren

You drag and drop from the right to the left. The second you touch a judge, any pairing that is off-limits—same school, already judged—will turn red. It's sort of fun to do, but as said above, it shouldn't be your first choice for making assignments.

**A useful tip:** If your round won't pair or judges won't assign, try again, especially if a round isn't particularly tiny. Occasionally tabroom will get a little lost the first time out, and when you hit the same button again, it will give a different result. Not what you'd expect with a computer, but try it. It can't hurt.

## MJP

Let's make it interesting. Let's add some Mutual Judge Preferences.

MJP rounds are paired like any other, to begin with. Do your check of the settings, autopair the round, then autopair the judges. What you get looks something like this:

Varsity LD

2	The School 17	Harrison AG	Lexington ZA	3	Garofalo, Paul	1/3	IN

Next to the judge's name on the right is the preference of each debater. The goal of MJP is to place the most preferred judges into the most important rounds (I've discussed this at length in my Tabbing Best Practices document.) Also, assignments need to be mutual, as the name says. Looking at the page above, we wouldn't question any of the 1/1 or 2/2 assignments; also, where there's only one number, only one side preffed. The 3/3 and 4/4 assignments, on the other hand, and the non-mutual assignments, need to be looked into.

Click on the room, to get the data on the questionable rounds.

## ROUND 1 DEBATE 44 OF VLD

### Judges

Chair	Judge	Foll	Rate	Prefs	School	Remove
N	John Bugnacki	0		4-4		Remove RM & Fine

Available judges:  [Add](#)

Judging elsewhere:  [Add](#)

### 2 Entries

Side	Record	Entry	Followers	School	
Aff	0-1	Newark Science AF Adegoke Fakorede	2	Newark Science	DD <a href="#">Move</a>
Neg	1-0	Cary AW Alexis Williams	2	Cary	AE <a href="#">Move</a>

What we want to do is see if there is anyone available better than a 4/4.

Clean judges without assignments...				
Prefs	Rds	School	Judge	
3-2	4	FC	Prasad Bikkani	
2-4	4	HIRED	Henry Curtis	
3-1	3	BC	Chris Insana	
3-1	4	BC	Austin Lowe	
4-2	4	BU	Wendy Holmes	
1-4	3	BR	Albert Han	
4-1	5	BL	Noel Selegzi	
1-5	3	AW	Andrew Meleta	
5-1	4	AT	Divya Srinivasan	
5-1	3	DM	Michael Melanson	

The answer is no.

Our next option is to see if a judge with an assignment already would be a better choice.

Clean judges who are judging already

Prefs	Bkt	CurPf	Event	School	Judge
2-2	0	1-6	VLD	BZ	Chetan Hertzig
4-4	0	6-1	VLD	HIRED	Salie Bhat
2-1	0	1-1	VLD	CV	Corey Long
2-1	0	1-1	VLD	CV	Marcia Long
4-5	0	1-1	VLD	HIRED	Ella Kuzmenko
4-5	0	1-1	VLD	HIRED	Matthew Khan
3-1	0	x-1	VLD	BT	Ro Applewhaite
1-4	0	1-1	VLD	HIRED	Devin Kasinki
2-5	0	1-1	VLD	AH	Jake Shaner

In this case, Hertzig looks like the only possible sub who would improve. So one would follow the trail and see where Hertzig is judging, and see if we can turn over some dominos and improve things all around. As a general rule, we can't. Tabroom evaluates hundreds of possibilities in the time it takes us to do one. More often than not, the dominos have already been arranged the best way possible.

This is where the human eye comes in. This is Round 1, and if you really can't improve, you really can't improve. In Round 4, however, you will now have a down-3 bracket. If we're following the Best Practice of pairing in order of down-2, down-1, down-0 and down-3, we might indeed want to go in and see if there are judges in the down-3 bracket who could be substituted for a low or imbalanced pairing in a round still in the running to break. For that matter, you can also look to putting a judge already in an undefeated round into a bubble round, if that is better for the bubble debaters. But still, experience shows that tabroom does all of this pretty well. You might be able to polish it a bit, but don't try to redo it wholesale. The best you'll do is waste a lot of time moving everything around with no overall improvement. Computers are just better at doing this than you are.

NOTE: Sometimes you can improve things a bit by switching flights. That is, if this is a Flight A round, it's only going to look at who's available/judging in Flight A. Try making it Flight B and seeing if that helps. Be careful not to put a judge in two of the same flights, though. This is where having a second pair of eyes is helpful in tab.

## Break Rounds

If you've already set up all your rounds correctly at Settings/Schedule, breaking the rounds is no big deal.

When you get to your first elim round pairing, it will look something like this.

**NEW BIGGIE DOUBLES: 11:30** 0 not in

**Change & Destroy**

Edit Doubles Settings

**Break round**

Pair round manually

As always, **Edit the Settings** under **Change & Destroy**. Then you're ready to press the green **Break Round** button.

Breaking the round will give you a list of teams in order, according to your most recent tiebreaker set. Here you can make a final determination now how many people you wish to break. You can break full elims (divisible by 8) or any run-off subset you want.

By the way, there may be situations where you do not wish to break a team, perhaps something to do with qualifications or the like. In that case, do all your end-of-tournament prep (speaker awards and such) now, because you are going to wreak havoc before you break the round. After you've got your end-tournament material printed out, go into the teams you don't want to advance, and drop them from the tournament. This will only affect their entries, and everyone else will move up. (Which is why you needed to secure their speaker award information in advance of dropping them.)

### Break from Round 5 of NB

1	1	BYE	217			IN
2	1	BYE	131			IN
3	1	BYE	167			IN
4	1	BYE	168			IN

Do note that, if you wanted to, you could move teams around so that they don't hit as they ordinarily would in a bracket. Be careful NOT to do this unless you really have a good reason for it.

## Tabulation

### Entering Ballots

TABULATION
Enter Ballots
Codebreaker
Status
Confirm Starts
Ballot Table
Breaks
Entry Cards
Enter Sweeps

Our next step, after the rounds are out, is to enter the ballots. This is all done under the **Tabulation** menu. There are a lot of options here, but for debate rounds you'll probably only use the first one, **Enter Ballots**. Feel free to explore the rest, but the real action is at the top.

One strong recommendation: Use the option under **Settings/Judges/Tabbing** to **Enter twice**. This is a better system than having ballots read aloud to an inputter, and is guaranteed to result in fewer tab errors than any sort of single entry. But don't shoot your own foot off by having one person enter the data twice. One person inevitably repeats the same mistake, usually missing a low point win. Do it the way it's supposed to be done, and you'll reap the benefits.

When you go to **Enter Ballots**, you'll see this on the right of the screen. Those numbers in green are your judges' codes. You can make it names, which is what you'll usually want to do, by changing the judge group setting to **Suppress judge codes (names only)**.

If there's multiple flights, it will show **Flight 1** and **Flight 2**. (No amount of writing letters to the *Times* will, apparently, get the programmers to change this to Flight A and Flight B. So it goes.) Obviously, there's two tabs, for **Undo** and **Done**.

Below is what the ballot entry page looks like. (Forgive the silly team names; this is from a test tournament.) There's nothing special here: put in the numbers and mark the winner. Do note the **Hints & Shortcuts** at the bottom.

If your computer doesn't have a number pad, it is recommended that you get a cheap USB add-on, which makes tabbing so much simpler than using the top of the keyboard.

You may have some divisions using half points and some using tenths, which are entered differently. You can set them both the same to protect your sanity in the tab room, but instruct your judges to do it the way you want them to do it. That is, my usual tab team likes to enter by tenths, but we tell our PF judges that the standard is halves; we get their half-points and translate them to tenths ourselves, which is way easier than switching back and forth, often ballot by ballot, as we enter LD, PF and Policy ballots at roughly the same time.

If you have a bye/forfeit, check the boxes at the right but don't enter points or a winner. Tabroom will handle that for you.

20 1028 Test 29

Mail Rnd 1

Side	Team	Points	Bye	Ft
Aff	Demonology T21	21, Test <input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>
Neg	Convent of the Whining Baby T3	39, Test <input type="text"/>	<input type="checkbox"/>	<input type="checkbox"/>

Winner:

Save Scores

### Hints & Shortcuts

Point step is set to half points. Entering 0 as the third digit after whole points advances the cursor to the next box. Entering . or 5 after adds .5 points to the total and advances the cursor. So 280 = 28 points, 28. or 285 is 28.5.

=, +	Switch Sides
a, p, g, 1	Aff win
n, c, o, 3	Neg win

Timeslot #: 11328, Round #: 72600 Panel #: 379574, Judge #: 168332

Undo Done

Flight 1

1034	1057	1078	1086
1036	1062	1080	1087
1041	1075	1082	
1043	1076	1084	
1056	1077	1085	

If you are doing double entry, after a ballot is first entered, it will turn yellow. Second entry will make it disappear completely (or, more accurately, migrate to the Done tab).

- Force Edit Results

There are some other functions you might find useful at the bottom of the page. They are self-explanatory, except for **Force Edit Results**.

There are a number of ways to get to a force-edit screen, and a number of variations to the screen, but they all look roughly like this. Prelim rounds have points, of course; this one has three judges as tabs. On this screen you can enter or fix results. Make sure you click the Done boxes on the left. There is no double-checking of entry here, so make sure you're confident that you've done it correctly.

## E-ballots

Electronic balloting is enabled on the **Settings/Event/Tabulation** page.

As far as tabroom is concerned, there isn't much to think about with e-balloting. First, you turn it on. Then, when a round is paired, you **blast** the round, and the judges are given their assignments.

When the judges get to the room and the round starts, they click on **start**. You'll see in the **Pairings** the exact time this button was clicked. And when they enter their results, the time will be placed by the word **In**, and there you are.

Dream on.

The first requirement for successful e-balloting is a wifi network capable of coping with the resulting traffic. One tournament we went to got their tech support to open up 1000 slots for about 300 entrants. All thousand slots were used up before the tournament started, because everybody and their coaches and their judges connected their computers, their phones, their iPads, their pacemakers, their Mickey Mouse watches—everything that uses electricity. By the time people got into the rounds, they couldn't get access to the network. E-ballots were tossed and we went to paper.

Second, you need a willing population of judges. As a rule, varsity LD and Policy judges go digital without a hitch. Other populations, especially PF, are not so hitchless. The thing about the PF pool is not that the parents that comprise most of it are digitally inept, but they are not particularly experienced as judges. The idea that they also have to cope with some new program or other, while trying to figure out which speaker went first, scares them. This may change over time, but if you're expecting to go digital with a PF event, don't expect full cooperation. It will be a mix of paper and electrons, which tabroom ballot printing allows for.

Third, and this is important: the geography needs to make sense. If a judge doesn't check in, and you're in the A building and the round is in the X building, who's over at X to

check and see if the judge is there or not? Site management issues do need to be considered. High schools with solid wifi are a no-brainer. Universities with a disparate pool spread over a couple of square miles? Use your judgment. You can e-enable any part of a tournament, independent of the other parts.

We supply a document before a lot of tournaments on how to connect as a digital judge, which will follow this entry. Adjust it as you see fit and distribute it as necessary. Even though the process is easy as pie doesn't make every potential e-judge a baker.

Keep an eye on the **Entries/Judge** page. New requests to connect for e-balloting are noted here, and may keep coming for the duration of a tournament. You have to approve people to get them in.

Sometimes school judges first need to be connected to their own teams. If someone has signed on to tabroom but you don't see them on your end, that's the missing link.

And sometimes a judge forgot their computer or whatever, and wants to be removed from the e-system. To do this, go to the judge's page and unlink them. Tell them that this is a permanent condition, and they will have to relink the next time they want e-ballots.

## E-Ballots Instructions

E-balloting means that instead of going to a ballot table to find a schematic and grab your ballot, you will get a notification on your phone sending you directly to your round. After the round when you've made your decision, you just enter it directly into the tab system. Neat, clean and fast! Plus, the ballots go on line for the debaters to consult later—no more lost ballots.

The first step in casting e-ballots is to register with tabroom.com. It is best to do this in advance of the tournament.

1. Go to **Tabroom.com**
2. Click **Sign Up** in the top right corner to create an account.

**CREATE YOUR TABROOM ACCOUNT**

Email Address:

First Name:

Last Name:

Phone Number:

Cell Provider:

Time Zone:

State (if applicable):

Country:

Password:

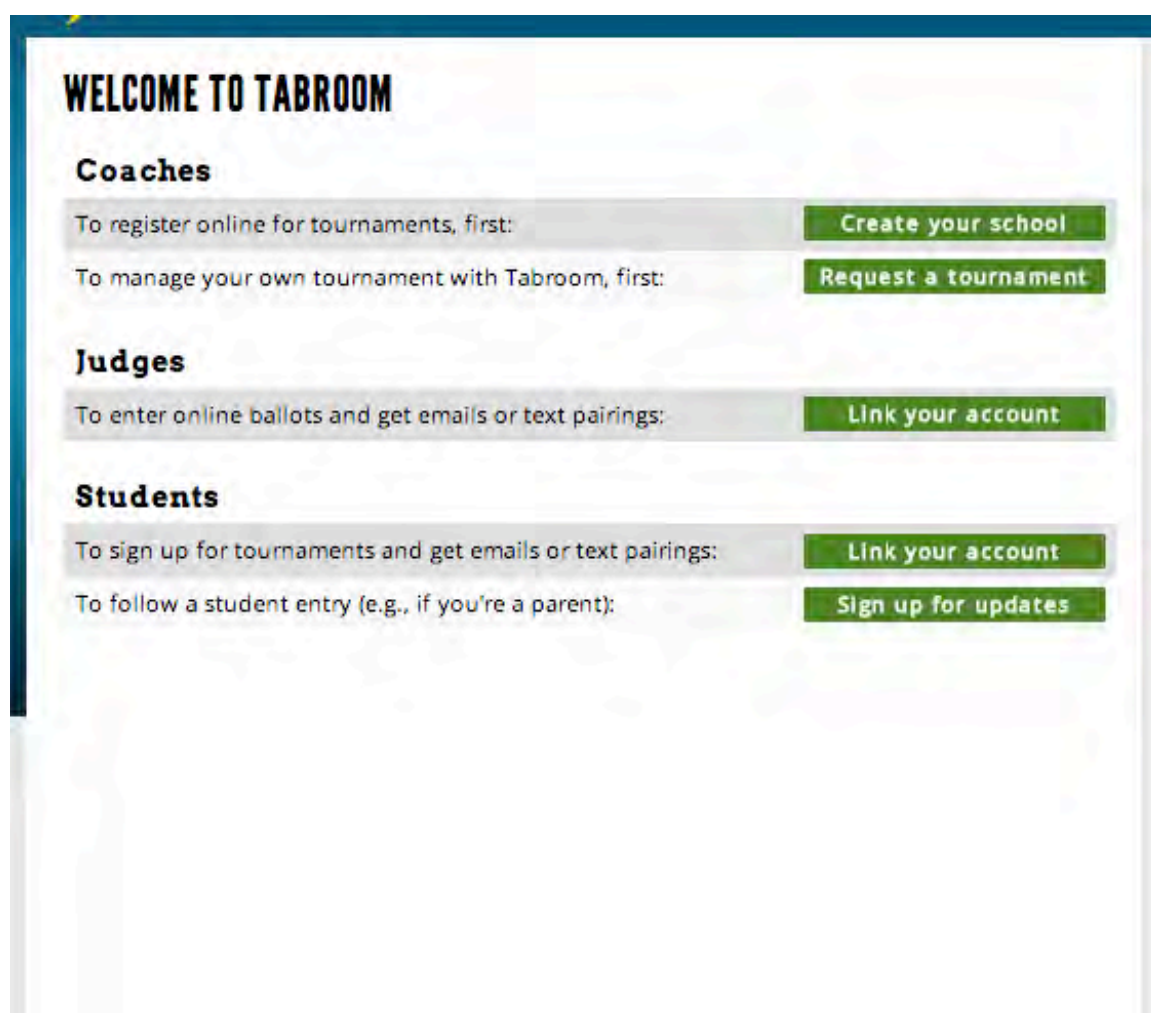

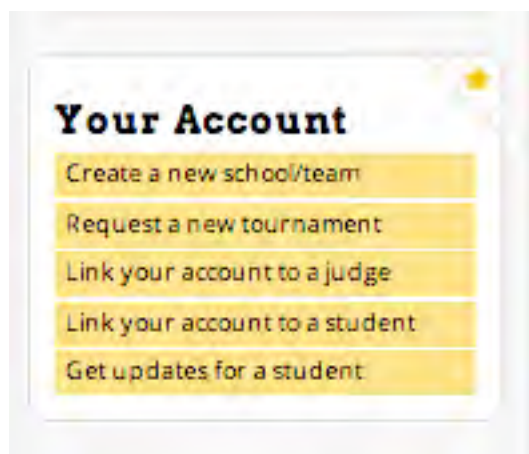

Repeat the Password:

**Create Account**

\* These fields are required.

3. Once an account is created, click **Link your account to a judge** under the **Your Account** header.

4. Search for your judge record within the tournament you're attending to connect your account.

As soon as you arrive at a tournament, connect to the wireless network.

Instructions for [your school here]:

1. Log onto the server **name of server**
2. Open your browser and navigate anywhere on the web. This will bring up the dialogue box to connect.
3. If you are asked whether to trust the network or to allow the server access to your computer, click yes and allow until you get to a login screen.
4. Username: **username**
5. Password: **pw**

After the tournament starts, you will get notifications whenever you have a ballot.

1. Go to your assigned room.
2. After the competitors arrive, go to tabroom.com. The ballot assignment page will be the first thing to pop up. When everyone is ready (and the sides are determined and set in PF), click **START ROUND** and the round can begin. This will let the tab room know that everyone is there and accounted for.
3. As soon as the round is over and you have made your decision, click on the **ENTER** button to submit your results. *YOU MUST CONFIRM THE RESULTS AS DIRECTED.*
4. RFDs and comments to the debaters should be entered after you've submitted the results (and even later, if you're rushing to your next assignment).

## Paneling

PANELING
Reports
Pair Rounds
Assign Judges
Assign Rooms
Judge Chart
Judge Pools
Room Pools
Publish

Paneling is where the Speech people do their work. With a couple of exceptions, you won't come here much if you're tabbing a debate tournament.

### Reports/Printouts

The first exception is **Reports**. To be honest, I wish there were a lot more reports in tabroom, and I've requested everything I can think of. I'd especially like to see in one easy place a list of judges and their availability, i.e., their time blocks. The best you can do as of this writing is to bring up the judge cards.

Judge cards and team cards, which we old-fashioned types used to resort to when TRPC failed us, are under

**Paneling/Reports/Tab sheets**. Once here, you have your choice.

They will "print" on the screen, and you can literally print and cut them up and lay them out on a table, if you need to. And with very small divisions, you may indeed need to. Some people can do that sort of thing practically in their head, using the manual pairing tools under **Pairings**. Some of us need cards. Tabroom serves both groups.

## Judge Pools

Judge pools are how you handle subgroups of the total judging pool. Primarily this means the judges still obligated/available during break rounds.

The screenshot shows a web interface for managing judge pools. The main title is "JUDGES FOR VLD BREAK". Below it, there's a "Pull from" dropdown menu set to "Varsity LD".

On the left, under "5 in pool:", there's a list of judges with checkboxes:

Judge Name	Team	VLD	Available
Matt Dunay	Bronx Science	VLD	<input checked="" type="checkbox"/>
Tom Erlanger	Byram Hills	VLD	<input checked="" type="checkbox"/>
Andrea Gellen	Scarsdale	VLD	<input checked="" type="checkbox"/>
Emily Krantz	Lakeland	VLD	<input checked="" type="checkbox"/>
Henry Curtis	NFA	VLD	<input checked="" type="checkbox"/>

On the right, under "8 VLD judges:", there's another list of judges with checkboxes:

Judge Name	Team	VLD	Available
Chetan Hertzog	Harrison	VLD	<input type="checkbox"/>
Benjamin Koh	Byram Hills	VLD	<input type="checkbox"/>
Nathan Muller	Harrison	VLD	<input type="checkbox"/>

On the far right, there's a sidebar with sections:

- Judge Group**: A dropdown menu set to "Varsity LD".
- Judge Pools**: A section with a "VLD breaks" button and a "Create/Edit Judge Pools" button.
- Rounds Using Pool**: A section with "Semis" and "Finals" buttons, both highlighted in yellow.
- Use for round**: A dropdown menu.

Here's the normal process. Throughout prelims, you'll use **All Judges** in your group, aside from those you've dropped or who have time blocks. In the break rounds, you'll use an ever-decreasing pool of judges still obligated. I call that pool **VLD Breakers**, or **NLD Breakers**, or whatever. You must assign the pool to specific rounds using the **Use for round** pulldown menu. The Semis and Finals in yellow are the rounds I selected for this pool.

You can create the pool at any time, but don't actually populate it until breaks come around. Step one is to go through the judges and mark any judge not available as, literally, not available. That is, if a judge is Friday Only, and time-blocked as such, and it is now Saturday, go in and mark the judge as **Active - No**. Do this one-by-one on the Entries/Judges page for the event. This will beige them out. If you don't do this, judges who are not really available because of time blocks will be assigned to your break rounds. It's one of the quirks of the program.

When you've done this and are ready to pair the first elim, go to the judge pool. The first thing to do is **Auto-populate** after the last prelim. This will move most if not all of the obligated judges from the right, the total group, to the pool. Any others you want to add from the total, just check them off. Refresh, and they'll move over to the blue.

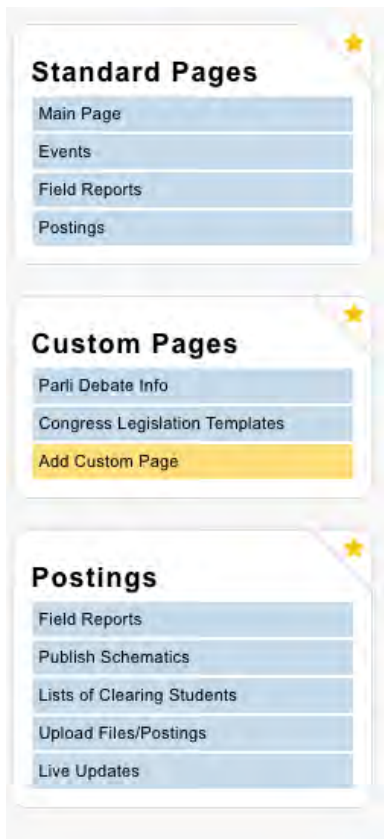

Do this after each round, eliminating (unchecking) from the blue list the judges no longer obligated as their teams are eliminated.

## Room Pools

Room pools are covered earlier,

## Results

### Postings During a Tournament

There are a lot of things you may wish to post before, during and after the tournament. Your tabroom website is your chief point of communication with the people attending your tournament, and they are already trained to consult tabroom from every other tournament they've been to, so that's where this is all going to happen. It's already been noted that a single iteration of your schedule, up-to-date, posted only on the website, is essential, done through **Settings/Website**. Now we'll talk about the rest of what you'll want on your site.

Some of what you can publicize is preset, for instance, **Field Reports** and **Events**. **Postings** pages are whatever you want to post that isn't already covered. And you can create completely **Custom Pages**.

The most useful function under category of **Postings** on the bottom right of this page is **Lists of Clearing Students**. This will show who broke, but not who they're debating or who's judging them. This is the traditional Saturday night posting.

Note that not only is there an opportunity to post for every event, but also for every break round. (The picture below is from a tournament after the fact.) This is probably more useful in Speech than in Debate, but one never knows.

**PUBLISH LISTS OF CLEARING STUDENTS**

CON					Final	<input type="checkbox"/>

Sweepstakes		View Print
NDCA Points	Arlington PF	Go

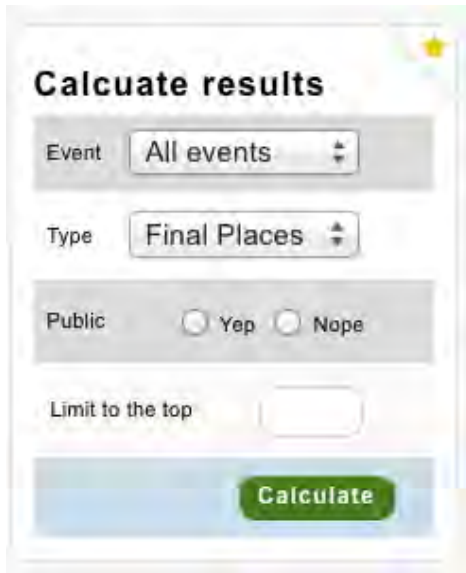

**Web Publish** puts everything up on the website. Note that the **Bracket** for each debate division appears automatically. The rest you have to calculate, or, in the case of the ballots, scan, save and upload manually. The buttons on the right being clicked **on** show that whatever it is, it is visible on tabroom. This means that although those self-motivated brackets will appear on this screen without bidding, they won't be published until you go in and publish them.

Public: ☐ Yep ☐ Nope

## Troubleshooting & Tips

### Never, ever, ever delete a school, a judge or a team after a tournament starts

If you want to drop a team, go in and drop it. If you want to drop a judge, mark the judge as inactive. If you have a whole school to get rid of, drop each team and inactivate each judge but leave the school entry alone. If the amount of money the school owes (but doesn't really owe because they're not there) is throwing off your accounting, go into their invoice and zero them out. Do any of these, but **never delete anything after a tournament starts**. Eliminating anyone completely will wreak havoc. If you do so despite this warning, bad craziness will ensue. You've been warned!

### Your ballots don't show points or ranks

The problem is in one of your rule sets. Either it's set up wrong, or it doesn't exist. You need a rule set for each activity, and you can't use the same sets for LD and Policy because of ranks. Check your rules first. Then look at your schedule: is there a rule set everywhere? Finally, look at tabulation for the event and make sure you have a good tiebreak set selected.

### A team is left out from breaks

This happens occasionally, and I'm not quite sure why. You can fix it by going to the team's entry. At the bottom is a list of their rounds. Simply add them into the round they didn't get into with the other teams. Do make sure they're hitting the correct team in the bracket.

5	8:00 AM	Millburn EL	C	FISHER-B 25	Cerneia	L	27 Ben Dodge 27 Brian Li	<a href="#">Move</a>
6	9:30 AM	Timber Creek RV	C	FAGIN 116	Pregasen	L	28 Ben Dodge 28 Brian Li	<a href="#">Move</a>
7	Not scheduled in Dubs							<a href="#">Add Manually</a>
8	Not scheduled in Octo							<a href="#">Add Manually</a>

### Give yourself a second tabroom account

If you're running a tournament on more than one device, for instance, using your iPad at the table to push ballots and your computer to do the work back in the tab room, create a second account for yourself (with a different email address, of course, but who doesn't have a dozen of them?) and give it access to the tournament. That way you won't always have to log in again as you switch machines.

**Don't expect very small divisions to work**

If you used to use TRPC, you know how often that program balked at small divisions. Tabroom may do likewise, or it may put out rounds that use judges or rooms twice, among other anomalies. The solution for this is to resign yourself to the inevitable, pair everything by hand and double-check everything right before you double-check it again.

**Doing the exact same thing and expecting different results may actually work!**

If your round won't pair or judges won't assign, try again, especially if a round isn't particularly tiny. Occasionally tabroom will get a little lost the first time out, and when you hit the same button again, it will give a different result. Not what you'd expect with a computer, but try it. It can't hurt.
